

# Outsource your warehousing with our warehouse logistics

Would you like to take the pressure off your warehouses at peak times? Do you need to store hazardous goods, bulky or very small products? Would you like to lower your fixed costs while at the same time increasing flexibility? No matter what your warehouse logistics problems, we offer a solution tailored to your own particular situation.

## **134,000 square metres of storage space**

Just call us 24 hours in advance and we will find space for your products, regardless of whether they are expensive medicines or bulky goods, hazardous substances or clothing. We operate ten advanced logistics centres offering storage space totalling 134,000 square metres. We can also accept goods when you want them to leave the warehouse again as quickly as possible and they are, for example, only to be repackaged or provided with an additional enclosure.

Rather than just from time to time or in part, you can even entrust your entire warehouse logistics to us. You can find out about all the benefits of this, what it costs and how we do it by talking to our logistics experts.

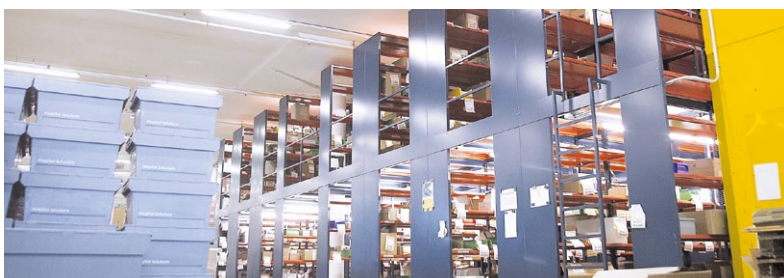

## **The advantages of customized warehousing**

If you outsource some of your warehouse logistics to us,

- you do not need to keep any staff or capacity in reserve, nor maintain the infrastructure to cover peak periods;
- you can cut your fixed costs while at the same time increasing flexibility;
- you have none of the costs associated with storage of special products (e.g. hazardous goods).

If you outsource all your warehouse logistics to us,

- you are not paying for a warehouse that is sometimes bursting at the seams and sometimes half-empty. On the contrary, your warehousing costs are as high or low as the degree to which the warehouse is full or empty, turning your fixed costs into variable costs;
- special storage costs – such as for additional stocks of a product or for a dangerous product – become transparent;
- you save on the staffing, building and infrastructure costs of a warehouse, and consequently safeguard your liquidity;
- as you don't need to worry about logistics, you can concentrate on your core activities.

#### The types of warehouse we offer

- Bulk storage: this type of warehouse is particularly suited to electronic goods (e.g. consumer electronics, IT and household appliances)
- Pallet warehouse: for large or bulky goods
- Small parts warehouse: for all kinds of spare parts or for very small products
- Temperature-controlled warehouse: ideal for temperature-sensitive pharmaceutical and medical products
- Hazardous substances warehouse: for chemical products that have to be declared
- Overhead goods warehouse: for clothing

#### Charging options for our services

##### Incoming goods

- Flat fee per inbound item
- Price per transport unit, batch, order unit, quantity, etc.
- Price per hour

##### In the warehouse

- Flat rate per month
- Price per transport unit, unit, 100 kg, cubic metre or day

##### Outbound goods/picking

- Flat rate fee
- Price per transport unit
- Price per parcel
- Price per hour according to time required

#### A warehouse in 24 hours

- Ordering 24 hours in advance to the nearest half-day during office hours is sufficient
- As a rule, on working days the goods are available within 12 hours
- In the case of picking orders, the goods are ready for shipping the next day if we receive your order before 12 noon.

#### Included

- Goods acceptance and unloading of consignments on pallets
- Detailed check (compare pre-advice, waybill and actual number of transport units received)
- Recording of batch/lot numbers and expiry dates
- Sampling
- Storage in standard warehouse facilities
- Packing suitable for shipping (excluding packaging material)
- Generation of delivery documents
- Outbound goods check

#### Additional services available

##### During acceptance

- Fast throughput and extended delivery windows
- Customs declaration and clearance of goods
- Customer-specific quality control
- Request delivery of orders placed with suppliers
- Returns handling

##### In the warehouse

- Special warehouse facilities:
  - High-security zone
  - Swissmedic-certified storage
  - Warehouse for hazardous products that have to be declared
- Inventory
- Monitoring and reporting warehouse temperature and humidity
- Management of empty containers, packaging materials and consumables
- Disposal

##### For shipping

- Setting up orders for acceptance between 4.30 p.m. and 8 p.m. to be delivered the following day
- Customer and sales-channel specific preparation of products and goods (incl. shrink-wrapping)
- Exports to European destinations
- Outgoing goods with insulation hood

##### Other services

- Provision of auxiliary staff
- Service level agreement
- Customer-specific billing and reporting
- Warehouse logistics information management
- Warehouse logistics consulting and implementation
